Satelitte radio provides variety and quality that are not available elsewhere. I originally bought my XM radio for one or two channels because I was travelling a lot and didn't want to have to keep changing stations as I drove to new areas. Since, I have come to love my satelitte radio and never listen to FM at all. Many times, I have found the travel reports in the New York area extremely helpful. My wife is the biggest weather bug I've ever met and I'm not sure she listens to anything else!

;) )

All that said, I think it would be a great shame if the NAB's petition (04-160) were to succeed. I see this as an opportunity for a great new technology to challenge existing companies to improve on their services. Please do not allow the NAB to take away from the great services that XM Satelitte Radio provides.

Thank you for your time and attention to this matter!
